CSS Layouts

DEADLINE: 30/06/2019

FOLDER STRUCTURE

FL11_HW4/*   *   – required
└ task/
    └ FL11_HW4.docx
    └ template.png
└ homework/*
   └ css/*
     └ style.css*
   └ img/*
     └news-list-1.jpg*
     └news-list-2.jpg*
     └news-list-3.jpg*
     └news-list-4.jpg*
     └sample-1.jpg*
     └sample-2.jpg*
     └sample2.jpg*
   └ index.html*

TASK

You need to create a HTML page template according to provided design (see template.png).
Use HTML5 semantic elements.
Minimum size of screen when web page shouldn't be "broken" is more and equal **900px.** For icons use Unicode® character table. All required images can be found in **img** folder.

Colors, used in design:

    #097774
    #FFFFFF
    #F3F3F3
    #F0F0F0
    #000000
    #E8E8E8
    #9E9E9E

Font, used in design:
Open Sans (http://fonts.googleapis.com/css?family=Open+Sans)

RESTRICTIONS

− Do not use any **javascript** or **css framework** for this hometask.
− No requirements for browser support (should correct work in Google Chrome last version).
− All distances between block set by yourself (tips: you can use Pixelperfect browser addon but it isn't requirement)

BEFORE SUBMIT

− Read requirements and compare to your homework result
− Format the code (remove unnecessary lines of code)
− Remove all unnecessary files that you might have included by mistake
− Validate HTML(https://validator.w3.org/) and CSS (https://jigsaw.w3.org/css-validator/)

SUBMIT

− The folder should be uploaded to github repository "**FL-11**" into **master** branch
